Transport, Storage & Serving Guidelines

To ensure your cake remains in perfect condition and tastes as intended, please follow the instructions below:

Transport Instructions

- Always lift the cake from the bottom only—never from the sides or top.
- Keep the cake completely level at all times during transport, refrigeration, and display.
- Place the cake on the front floor of the vehicle, not on seats or laps.
 - Ensure the air-conditioning is on and directed toward the cake.
 - Use a non-slip mat or yoga mat underneath the cake box to prevent it from moving.
- Drive directly to your venue, avoiding unnecessary stops.
- Drive cautiously, no harsh braking, sharp turning, or sudden acceleration.

Storage Instructions

- Store the cake in the refrigerator until it is time to display or serve.
- Before serving, remove the cake from the refrigerator and allow it to come to room temperature.
 - As our cakes are butter-based, they may be dense if eaten cold.
 - Cakes covered in white chocolate ganache may crack or crumble if cut while too cold.
 -

Serving Tips

- Use a sturdy cake stand that is at least 5cm larger than the cake board.
- Remove all decorative elements (e.g. flowers, toppers) before cutting and serving.
- To store leftovers, place the cake in an airtight container in the refrigerator.
- Cake cutting guide to be followed.
